

EXPERIENCE

March 2013 - Present Architectural Designer

Floisand Studio - Seattle

Assist principles with conceptual design through construction administration for renovation, additions and new construction of single family residential, commercial and adaptive reuse projects. Coordinate with contractors, consultants and clients for permit submittals and construction documents and details. Set up and maintain CAD office standards.

August 2009 - May 2010 Teaching Assistant

Tulane University - New Orleans

Assisted in the grading of student projects and tests and led a bi-weekly study group for the integrated sustainable technologies course.

July 2009 - August 2009 Summer Intern

Murdock Young Architects - New York

Was responsible for interior elevations to provide equipment and accessory layouts in addition to documenting the built conditions during renovation for residential projects.

July 2005 - August 2008 Architectural Designer

Mahlum - Seattle

Produced renderings, physical and digital models and construction documents for education and healthcare projects. Was part of the team for a 20,000 square foot healthcare facility for which I developed physical and digital models and renderings for presentations. Coordinating with consultants to produce drawings (patient room layout, floor plans, details, wall sections and elevations) for all phases of design and construction documents including construction administration.
